COLLABORATIVE PROJECTS

THE1215
- The innovative idea "**THE 1215**" is based on musical cryptography. It has two different outcomes, **plain text to music and musical notes**. The project demonstrates our team's creativity.

FEISTEL-P-VOL
- "**Feistel-p-vol**" uses an old algorithm widely used in world wars 1 and 2 to provide a highly secure communication path. The system performs deciphering automatically without user interruption and encrypts plain text further in layers.

Multiple Cipher Text
- MCC is a console-based project that **encrypts and decrypts text** into multiple ciphers according to the **user's selection**. It includes the **Morse code, Caesar cipher, and Vigenere cipher** options, as well as a unique cipher developed by our team that encrypts and decrypts text using symbols on the keyboard.

Safe Connect
- safe connect is a project based on wire less networking using **openwrt** with **raspberry pi B 4** and **openvpn** .Here to avoid the data collection (user info) and providing vpn services .The user can connect the raspberry pi to any open network and from there the raspberry pi provides the hotspot the nearby devices
